

**ABSTRACT OF THE DISCLOSURE****DESTINATION DEVICE BILLING ACCORDING TO CALL RECIPIENT**

5       A method, system, and program for billing for service  
provided to destination device according to the calling plan of  
the individual receiving the call. An authenticated identity for  
a callee answering a call placed to a destination device is  
received at an intermediary device. The intermediary device then  
10 accesses a billing plan for the authenticated identity of the  
callee and loads the billing plan for specifying charges for the  
call, such that telephone service billed to the callee is  
accessible at multiple destination devices.
